

NGX Company Data

Complete, as-reported financial statements and daily prices for the companies of the Nigerian Exchange — cleaned, arithmetic-verified and free to explore, screen and download at sustainafinancedata.com

147 companies covered	152K+ financial data points	6,668 statements (filings)	478K daily prices 2000 – 2026	G + C group & company levels
---------------------------------	---------------------------------------	--------------------------------------	--	---

For every company: the **income statement, balance sheet and cash flow** as reported across the years — at Group (consolidated) and, where published, Company (parent) level — plus computed ratios (margins, returns, liquidity, leverage, valuation) and daily share prices. Figures come from annual reports and NGX filings, are standardised to base Naira (USD filers converted at per-year rates), and every statement is checked against its own arithmetic: revenue through to profit, balance-sheet identity, and the cash-flow chain from opening to closing balance.

*How to access: create a free account at sustainafinancedata.com → **Company** for full statements (Excel/CSV download per company) or **Screeners** to filter the whole market by sector, company and any field across years — and export the entire panel. Built for students, researchers and analysts.*

Insurance · 22 companies

Insurers and reinsurers, premium income through to insolvency cases — solvency visible in the balance sheets.

Years = fiscal years with statement data. Levels: G = Group/consolidated, C = separate Company/parent statements also available. Firms whose coverage stops before 2023 are delisted or suspended — their history is preserved for research.

What you can do with it

Screen the market — Filter by sector or company, add any financial field, ratio or price metric across years, and export the full result panel to Excel — not just the visible page.

Read full statements — Every company page shows the income statement, balance sheet and cash flow side by side across all covered years, with a one-click download of the complete set.

Trust the numbers — Statements are chain-verified against their own arithmetic and cross-checked to published annual reports; scales are harmonised so a million naira means the same thing everywhere.

Go deeper with macro — Pair company fundamentals with 109 official NBS/CBN macro datasets — inflation and CPI by state, GDP, FX, debt — on the same platform (see the companion Macro Data guide).

Start exploring — free for students and researchers

Compiled July 2026 · Sources: company annual reports and NGX filings. SustainaFinance cleans, standardises and verifies the data; always confirm critical figures against the original filing.
