

Nigerian Macro Data

109 official datasets from the National Bureau of Statistics (NBS) and the Central Bank of Nigeria (CBN) — cleaned, standardised and free to explore and download at sustainafinancedata.com

109 datasets	638K+ data points	1981 – 2026 years of coverage	21 state-level panels	2 official sources NBS · CBN
------------------------	-----------------------------	---	---------------------------------	---

Every series is extracted from the institution's own periodic reports, statistics API or the CBN Annual Statistical Bulletin — never third-party aggregators — so each figure is traceable to a specific official publication. The backbone is an NBS **state-level panel covering all 36 states and the FCT** (CPI, food and fuel prices, transport fares, FAAC allocations, IGR, capital importation and more), surrounded by the full national picture: GDP, trade, public debt, money and banking, and the external sector.
